

```
/*  
    DOM Manipulation in Javascript  
*/
```

```
// Eg:1
```

```
/*  
let body = document.body;  
// body.append("DOM MANIPULATION");  
body.innerHTML="<h1>DOM MANIPULATION</h1>";  
*/
```

```
// Eg:2
```

```
/*  
let body=document.body  
divElement=document.createElement("div");  
divElement.innerHTML="<h1>Document Object Model</h1>";  
// divElement.textContent="<h1>JS Document Object Model</h1>";  
body.append(divElement);  
*/
```

```
// Eg:3: It's using html code in Welcome & Javascript...
```

```
/*  
let divElement=document.querySelector("div");  
console.log(divElement.innerText);  
console.log(divElement.textContent);  
console.log(divElement.innerHTML);  
*/
```

```
// Eg:4 // It's used to the create the elements in DOM...
```

```
/*  
let body=document.body;
```

```
let divElement=document.createElement("div");  
let h1Element=document.createElement("h1");  
h1Element.innerText="Welcome to Javascript";  
divElement.append(h1Element);  
body.append(divElement);  
*/
```

//Eg:5 It's using html code in FName & LName...

```
/*  
let divElement=document.querySelector("div");  
let FName=document.querySelector("#FName");  
let LName=document.querySelector("#LName");
```

```
console.log(FName);
```

```
console.log(LName);
```

```
FName.remove(); // It's removed the FName...
```

```
LName.remove(); // It's removed the LName...
```

```
divElement.append(FName); // It's added the FName...
```

```
divElement.append(LName); // It's added the LName...
```

```
console.log(FName.getAttribute("value")); // getAttribute: It's used to get the value...
```

```
console.log(LName.getAttribute("value")); // getAttribute: It's used to get the value...
```

```
FName.setAttribute("id", "FirstName"); // setAttribute: It's used to replace the value of id...
```

```
LName.setAttribute("id", "LastName"); // setAttribute: It's used to replace the value of id...
```

```
LName.removeAttribute("value"); // removeAttribute: It's used to removed the value...
```

```
*/
```

```
// Eg:6 // It's used to the html span tag code...
```

```
/*
```

```
let MyName=document.querySelector("#MyName");
```

```
MyName.classList.add("MyClass"); // It's added to the class...
```

```
MyName.classList.remove("MyClass"); // It's remove to the class...
```

```
MyName.classList.toggle("MyClass",false); // toggle: It's used to remove the class value...
```

```
MyName.classList.toggle("Class-1",false); // toggle: It's used to remove the class value...
```

```
*/
```

```
// Eg:7
```

```
let Name=document.querySelector("#Name");
```

```
Name.style.color="yellow";
```

```
Name.style.backgroundColor="black";
```
